FOREWORD

THE Exhibition Board takes this opportunity to convey to the President and Directors of the Art Club its very hearty thanks for the use of their galleries, and also to thank the Architects and other Artists who have contributed their works for exhibition.

In continuing the series of examples of Old Colonial Architecture the Board has this year chosen for illustration certain old Churches in Philadelphia and the vicinity. It is hoped that these pages will prove interesting and be of permanent value.

To Mr. Edwin H. Fetterolf, the Board is indebted for the Cover and Title Page of the Year Book.

The attention of Architects, and all others interested in this publication, is directed to the advertising pages, in which will be found much valuable information for constant reference.

THE WALTER COPE MEMORIAL PRIZE

Endowed by Mrs. Walter Cope, in memory of her husband, who was one of the founders of the T Square Club, and awarded annually by the T Square Club to the winner of a competition for projects on Municipal Improvement or Landscape Architecture. It is now of a value of about one hundred and fifty dollars, and is expended for Architectural Books or Architectural Education chosen in consultation with the Executive Committee of the T Square Club.

The prize winners and the subjects for competition have been as follows:

- 1904—A Monumental Entrance to Fairmount Park, Philadelphia. HENRY B. WARD.
1905—A Recreation Park and Pier on the Delaware River Front. ANDREW J. SAUER.
1906—A Subway Kiosk. C. EDGAR COPE.
1907—A Covered Bridge Across Market Street, Philadelphia. FRANCIS PALMER SMITH.
1908—A Monument at the Entrance of the Harbor, Philadelphia. GRANT M. SIMON.
1909—Two Types of Electric Light Standards for Street Lighting. HENRY EDWIN RIEGER.
1910—Treatment of a Public Square on the Parkway. WM. RICHARD M. KEAST.
1911—The Treatment of a City Block of Two-story Dwellings. A. RAYMOND HOLLAND.
1912—A memorial to John Ericsson on the Parkway.

1st Prize—GABRIEL B. ROTHKUGEL. 2d Prize—PETER F. GETZ.

- 1913—Design for a New Case for Liberty Bell, Independence Hall. JOHN F. HARBESON.

- 1914—A Monumental Feature at the End of South Broad Street.

1st Prize—THOMAS ASH. 2d Prize—S. A. LOVE, JR.

- 1915—Treatment of an Open Place at the Head of the Bridge over the Schuylkill River at Packer Avenue, South Philadelphia.

1st Prize—W. P. BARNEY. 2d Prize—F. W. HASTINGS.

THE JOHN STEWARDSON MEMORIAL SCHOLARSHIP IN ARCHITECTURE

FOUNDED 1897

(PRIOR TO 1897 THE TRAVELING SCHOLARSHIP OF THE UNIVERSITY OF PENNSYLVANIA)

Endowed in memory of the late John Stewardson and awarded every year or alternate year by a Managing Committee, consisting of one member of the Board of Trustees of the University of Pennsylvania, one member of the Corps of Instruction of the School of Architecture of the said University, and three practicing Architects of the city of Philadelphia, two representing respectively the Philadelphia Chapter of the American Institute of Architects and the T Square Club of Philadelphia, and the third being elected by the four other Members of the Managing Committee. It is of a value of one thousand dollars, the sum being expended in pursuing Architectural study either in the United States or in other countries. Preliminary examinations are required except for graduates of any recognized School of Architecture. Open to any person or persons under 30 years of age, who shall have studied or practiced Architecture in the State of Pennsylvania for the period of at least one year immediately preceding the examination.

AWARDS

UNIVERSITY SCHOLARSHIP

- 1893—A Building for a Numismatic Society. JAMES P. JAMIESON.
1894—A Railroad Station. GEORGE BISPHAM PAGE.
1895—A Savings Bank. PERCY ASH.
1896—A Post Office and a Custom House. ALBERT KELSEY.

STEWARDSON SCHOLARSHIP

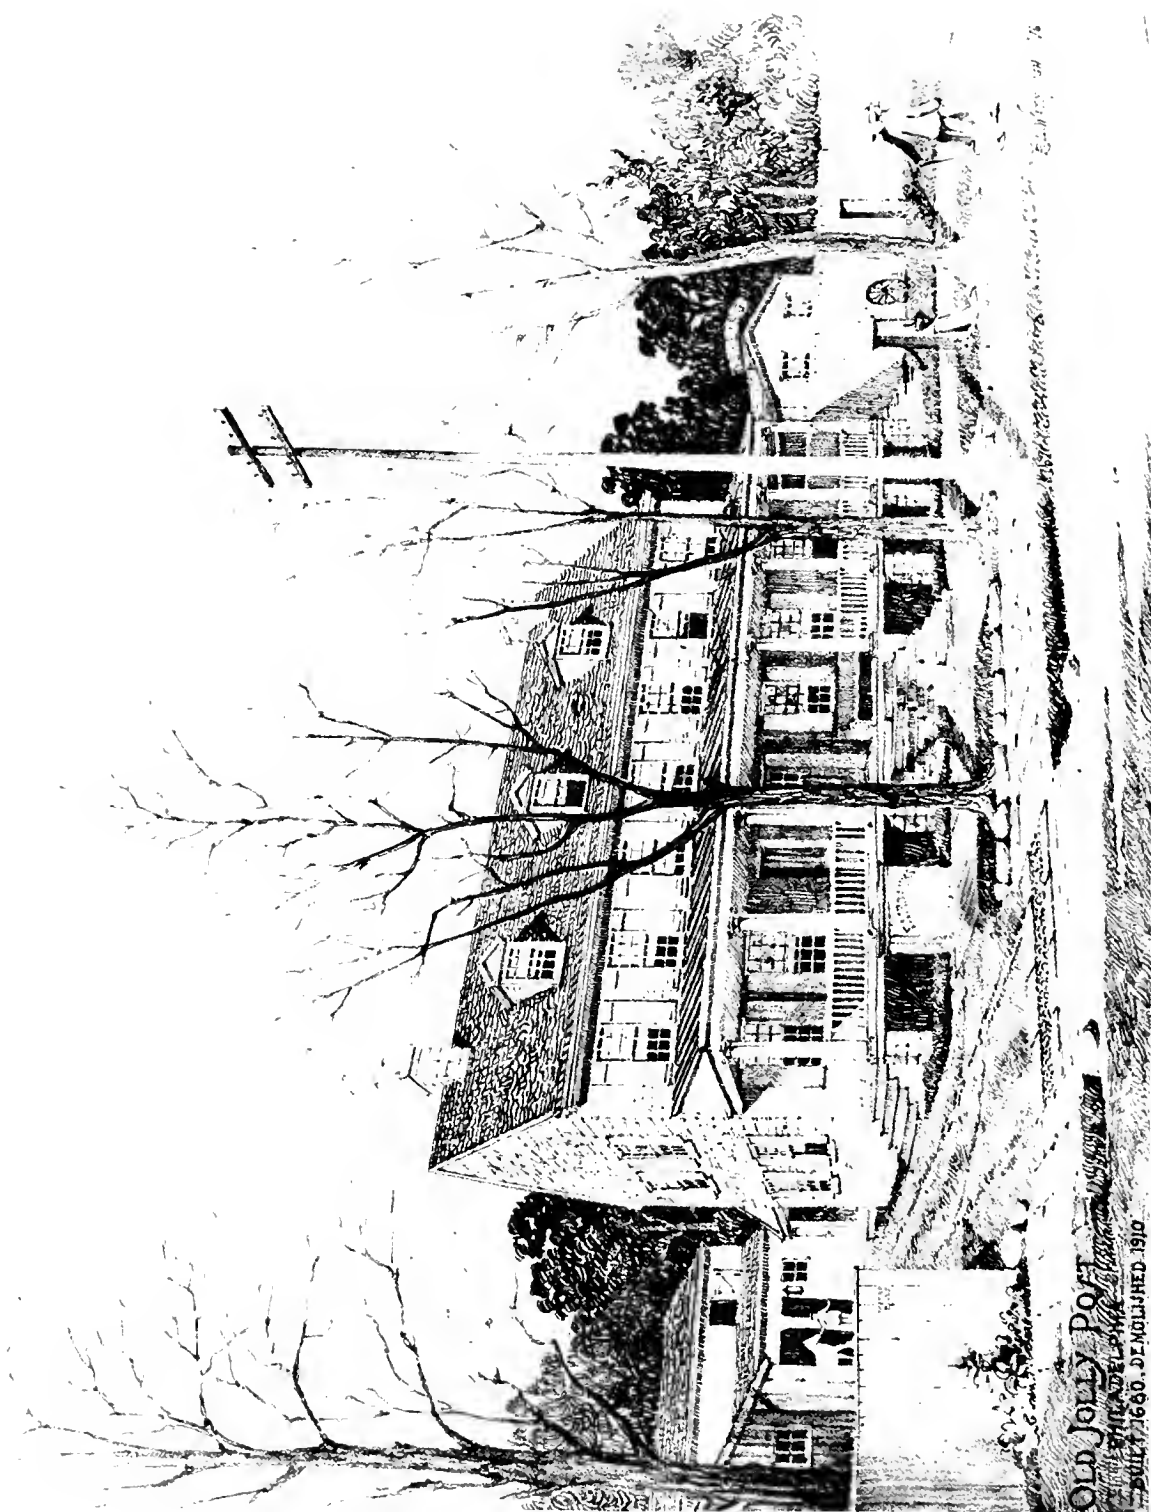

- 1897—A City Church. HERMAN LOUIS DUHRING, JR.
1898—A Farm House and Farmstead. WILLIAM CHARLES HAYS.
1899—A School of Architecture, with a Museum of Architectural Casts. ARTHUR HOWELL BROCKIE.
1900—The Improvement of the Entrance to Fairmount Park, Philadelphia. ALFRED MORTON GITHENS.
1901—A Casino and Bath at a Health Resort among the Mountains. IRA WILSON HOOVER.
1902—A Boys' School in the Country. JOHN MOLITOR.
1903—An Official Building for a County. WALTER W. JUDELL.
1904—A Terminal Station of an Underground Electric Railway. CHRISTIAN GEORGE SPOERL.
1905—A Monument Commemorative of the Independence of Cuba. CARL EUGENE HOWELL.
1906—An Auditorium Building for a University. W. WALTER SHARPLEY.
1908—A Monumental Bridge. HARVEY ARTHUR SCHWAB.

MORE LIGHT

Barrett Specification Roofs and the General Electric Company

THE chain of huge and handsome buildings shown below, is set in the midst of twenty-seven acres of broad lawns and trees and looks more like a university than a business establishment.

It is, however, Nela Park, the site of the National Lamp Works of General Electric Company. Its product is the famous National Mazda Lamp. Undoubtedly it is the handsomest commercial establishment in America, perfect in every detail, including the roofs, for every one of the great buildings is covered with a Barrett Specification Roof.

These roofs were chosen because:

—they will give greater service at lower cost than any other permanent roofing;

—they require no painting, coating or attention of any kind;

—they will give perfect protection for upwards of twenty-years;

—they are accorded the base rate of insurance and are approved by the Underwriters' Laboratories.

Special Note We advise incorporating in plans the full wording of The Barrett Specification, in order to avoid any misunderstanding.

If any abbreviated form is desired, however, the following is suggested:

ROOFING—Shall be a Barrett Specification Roof laid as directed in printed Specification, revised August 15, 1911, using the materials specified and subject to the inspection requirement.

A copy of The Barrett Specification, with roofing diagrams, free on request.

- 1 Hydraulic Dumbwaiter Plunger

FEW Specifications have so much "say" in any building's commercial success as its elevator equipment.

The entire public being accustomed to

OTIS ELEVATORS

is not to be satisfied with anything below the Otis Standard of elevator service.

The different types of Otis Elevators make it as easy as it is expedient for the Architect to provide every class of building with Otis service.

OTIS ELEVATOR COMPANY

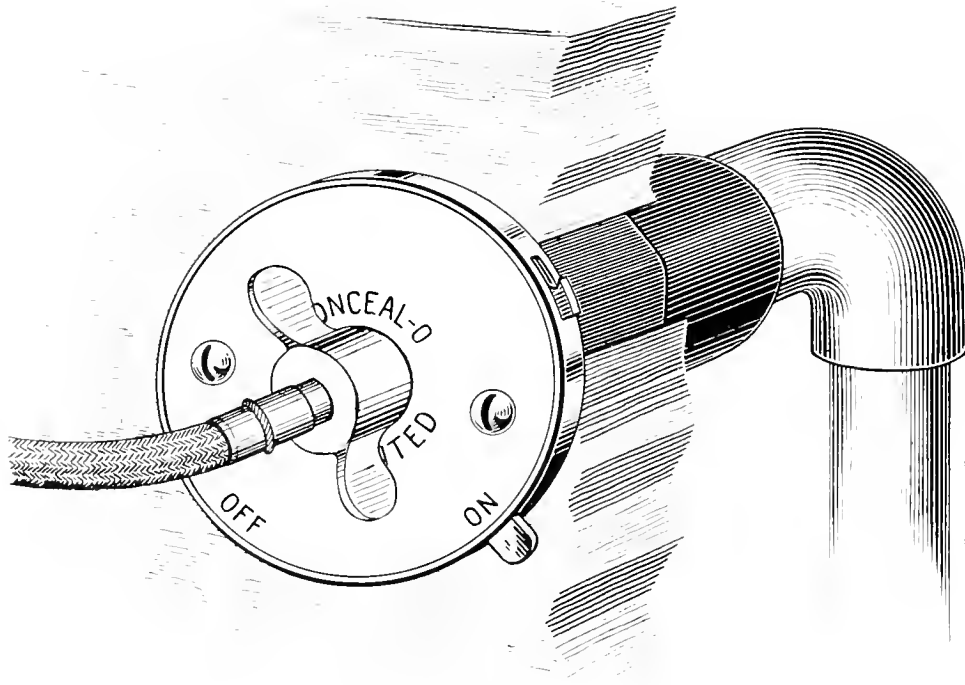

Eleventh Ave. and Twenty-sixth St., New York

Offices in All Principal Cities of the World

The WORLD'S WORD for

ELEVATOR SAFETY

Don't Overlook "Conceal-O" Outlets

PORTABLE gas appliances such as table lamps, room heaters, coffee percolators, chafing dishes, etc., have become a matter of everyday convenience in the home and there should be suitable outlets in every room for their use.

"Conceal-O" outlets furnish safe, quick and inconspicuous connection for such appliances. They can be placed in the wall, baseboard or floor, while the house is being built, at very small cost.

The best time to insure efficient gas service for the home is when specifications are being drawn. Our representative in charge of service to architects will be pleased to call and demonstrate the "Conceal-O" and give you data for your files.

Tell them about this Hot-Water Service

WHEN your clients want to know how they can get all the hot water they want when they want it and with no trouble and at slight expense the answer should be

The **AUTOMATIC GAS WATER HEATER**

It is always "on the job" for service at the turn of a faucet. This, and the fact that it gives an inexhaustible supply of hot water without attention, makes it an attractive feature of the 20th century residence.

We maintain a thorough service to architects. The man in charge of this service will be pleased to call upon request with full information about the Automatic Gas Water Heater. The facts and figures are worth having in your files.

The United Gas Improvement Company

TELEPHONES: BELL — Filbert 2191 or KEYSTONE — Race 2690

The Architect
&
the "Standard"

WE confidently believe that we manufacture every plumbing fixture and accessory the architectural profession requires. We are equally confident that "Standard" Plumbing Fixtures are unsurpassed in pattern, form and quality. Certainly no more impressive endorsement of "Standard" products could be obtained nor desired, than the plain fact that since the year 1900 the public has purchased 3,500,000 Baths, 4,000,000 Lavatories, 950,000 One-piece Sinks and a correspondingly large number of other "Standard" Fixtures. Altogether nearly 13,000,000 "Standard" fixtures have been sold since 1900.

Quality alone can demand this volume of business.

The extent and variety of our line with the frequent additions of new patterns make it mutually profitable that architects keep in close personal touch with our representatives. To this end we offer the service of our showrooms and a country-wide organization of trained men. We bespeak your consideration of the 1916 "Standard" service.

There are three Lewis links—

Lewis White Lead

Lewis Linseed Oil

Lewis Oil Colors

Think of them as a unit. United they mean good, durable paint—true economy in preserving buildings.

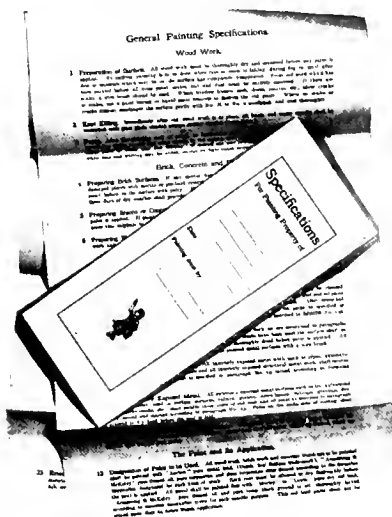

The main strength of the Lewis links lies in being used together, because any one link is just as necessary as the other two. Remember a chain is no stronger than its weakest link.

Strict adherence to an honest policy of producing only the best has made all the Lewis links standard. They are made to go together. Specify all three—Lewis White Lead, Lewis Linseed Oil and Lewis Oil Colors.

John T. Lewis & Bros. Company

LAFAYETTE BUILDING, PHILADELPHIA

PAINTING SPECIFICATIONS

WE will send any architect, who makes application to our nearest branch, copies of the Dutch Boy painting specifications. These specifications cover the painting outside and inside of wood, brick, concrete, plaster, etc., with

*Dutch Boy White Lead
and Dutch Boy Linseed Oil*

Paint made of these prime paint materials not only lasts longer, but it wears down smooth and even and looks well while it wears. Any texture, tint and finish can be obtained.

Standard Varnishes, Stains and Enamels Dependable for Perfect Results

ELASTICA
TRADE MARK

—No 1—
For All
Exterior Work

Where greatest durability is required. Does not scratch or mar white. Excels all other varnishes for use on woodwork exposed to the weather, front doors, steamships, boats, yachts, canoes, spars, etc. Is water-proof, resists the action of salt and fresh water, is unaffected by either hot or cold water.

ELASTICA
TRADE MARK

—No 2—
For Finest
Interior Work

Extreme paleness and durability are distinguishing features of this varnish. Especially recommended and intended for finishing finest woodwork in residences and public buildings. Works freely, covers the maximum surface area and produces a beautiful, permanent gloss or rubbed finish.

ELASTICA
TRADE MARK

Floor Finish
The One Perfect
Floor Varnish

Combines quick and hard drying properties without sacrificing elasticity or durability. Protects floors under severest wear and frequent washing. Does not mar, scratch white or spot. Dries hard enough over night to walk on. Can be rubbed. On grained, painted or old floors, linoleum or oil cloth, one coat sufficient.

Satinette

Enamel
The Immaculate
Finish of
Refinement

Made in White (Gloss), (Rubbed Effect) and (Flat). Does not settle, harden in can or skin; will not turn yellow. Unequaled for obtaining a perfect enamel finish, unexcelled for durability. A Satinette enamelled surface can be repeatedly washed without injury.

KLEARTONE
TRADE MARK

—Stains—
Oil and Acid

Represent the most advanced product of this character on the market. They emphasize the natural beauty of the wood and produce most artistic effects. They are labor-saving stains, penetrate deeply into the wood, dry rapidly, are absolutely uniform in shade and will not fade if applied according to directions.

C. TEMPLETON CROCKER'S RESIDENCE, HILLSBORO, CALIFORNIA

This residence is equipped throughout with Hajoca Plumbing Fixtures, specified by Willis Polk and Co., Architects, San Francisco, California

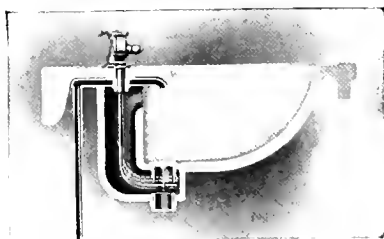

WHEN an architect specifies Hajoca Plumbing Fixtures the client is assured goods of character as well as of sanitary excellence.

Your plan to have baths and lavatories, that will be sweet and clean every time fixtures are used, will be amply provided for by specifying the Hajoca No. 10 Bath and Basin Wastes.

They prevent soapy waste or residue from previous users backing up into the fixtures at the next drawing.

Your clients will appreciate these sanitary devices. They go a long way in protecting the health and providing for the comfort and welfare of the home, whether mansion or bungalow.

We highly recommend them for your every specification.

The Hajoca No. 10 Basin Waste prevents soapy residue backing up into the bowl at the next drawing

The MINNEAPOLIS HEAT REGULATOR "The Heart Of The Heating Plant"

There is no other single item of home equipment which at so little expense affords so much comfort, convenience, economy and safety as the installation of this device.

Its accurate operation maintains a uniform temperature of any desired degree both day and night and by a simple adjustment of the clock attachment, it will automatically and silently at any set hour, operate for a definite change of temperature.

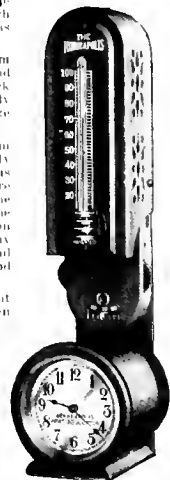

With our newest Model (No. 55) the mechanism is so arranged that at night by an entirely automatic operation the thermostat pointer is moved back to the desired night temperature and again in the morning moved forward to the desired day temperature, the "throw" of the pointer being adjustable to any exact degree on either side of 70°. This is not possible with any other thermostat and these exact night and morning changes take place every 24-hour period for 8 days, with one winding.

The Minneapolis is used with any heating plant—oil or now-burning coal or gas. Has been the standard for over 30 years.

Sold by the heating trade everywhere under a positive guarantee of satisfaction.

Our booklet shows all models, explains details and gives prices

Cabot's

Creosote Shingle Stains

*The Standard Exterior Stains for Shingles
Siding or Trimmings*

The first shingle stains ever made, and the quality guaranteed by thirty years' use all over the world. Made of the strongest and finest pigments, ground in pure linseed oil and creosote, "the best wood preservative known." No cheapeners, no adulterants, *no kerosene or benzine*.

Cabot's Old Virginia White

A soft, clean white, as brilliant as whitewash and as durable as paint.

Cabot's "Quilt"

Cold-Proof Heat-Proof Sound-Proof

The warmest lining. One layer equal to 28 to 40 layers of common building paper. Saves its cost many times over in reduced fuel bills. The most perfect sound-deadener, because it breaks up and absorbs the sound-waves. Scientific, sanitary and unflammable.

Cabot's Waterproof Cement Stains

For waterproofing and artistically tinting stucco and similar cement surfaces.

Cabot's Waterproof Brick Stains

For freshening and restoring old, faded and discolored bricks, and waterproofing all bricks.

Cabot's Conservo Wood Preservative

For preserving posts, sills, planking and all lumber that is exposed to decay.

Cabot's Damp-proofing

For direct plastering on brick or concrete without studding or lathing. Forms a perfect, permanent and impervious bond.

The McDaniel Improved Steam Trap

Discharges Continuously and Never Blows Steam. Made Extra Heavy for High Pressure. No pipe connections are broken when making repairs, all steam pipes being attached to body. Steam can't blow through. Always maintains water seal over discharge valve. They have large discharge valves and cannot be flooded with sudden flushes of water. We also manufacture Reducing Valves, Pump Governors, Relief Valves, Exhaust Pipe Heads, Ejectors and Steam Separators.

All working parts are here

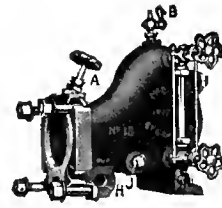

Quick and easy
to take apart.

AQUABAR CONCRETE TILE ROOFING

EVERLASTING — FIRE-PROOF — WATER-PROOF

AQUABAR CONCRETE ROOF TILE is the perfection of a universally accepted type of modern industrial roofing—made of selected aggregates and best Portland cement, which are mixed and poured wet, under a special process forming an unusually hard, dense and impermeable concrete of maximum strength.

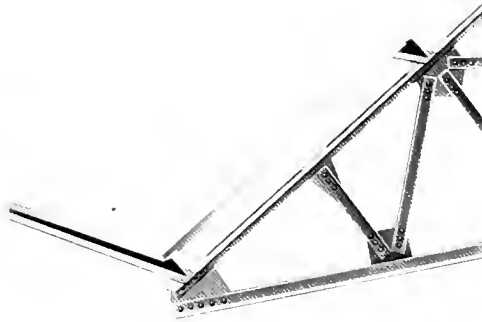

AQUABAR CONCRETE ROOF TILE weighs only seventeen pounds to the square foot—this feature alone means a saving of 20% on the cost of structural steel.

AQUABAR CONCRETE ROOF TILE is designed to be laid directly on the purlins—eliminating forms—saving time and money. This tile is made and seasoned in our own factory, and can be laid in the coldest weather without danger of freezing.

AQUABAR CONCRETE ROOF TILE is made in sizes 2 ft. wide x 5 ft. long (or length to suit

Aquabar Concrete Tile Roofing on Two Reservoirs for the Pennsylvania Institution for Feeble-minded and Epileptics, Spring City, Pennsylvania

View showing method of laying Aquabar Concrete Roof Tile

purlin spacing) by 1½ in. thick. Each end of the tile is rabbeted to rest on the flange of the I-beam purlin. After tile is laid, the joints are grouted and pointed and the entire roof should then be covered with some form of composition roofing.

AQUABAR CONCRETE ROOF TILE costs less than solid slab construction.

Its simplicity, durability and low cost commend its use in buildings of every type.

We maintain a competent staff of engineers to furnish designs for structural steel roof framing to facilitate the use of **AQUABAR CONCRETE ROOF TILE**.

Their services are at the command of architects, engineers and contractors contemplating fire-proof roof construction.

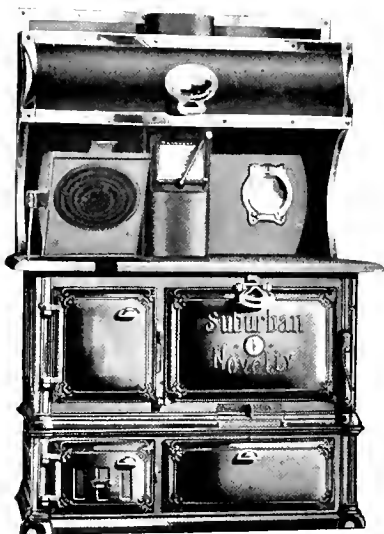

Send for Booklet

THE SUBURBAN NOVELTY RANGE

FOR SUBURBAN HOMES

BUILT at the suggestion and after specifications of one of the leading architects of the east.

¶ A HOT-WATER RANGE. Has ample capacity to supply hot water for from three to five bath-rooms and to take care of all cooking requirements at the same time.

ABRAM COX STOVE COMPANY

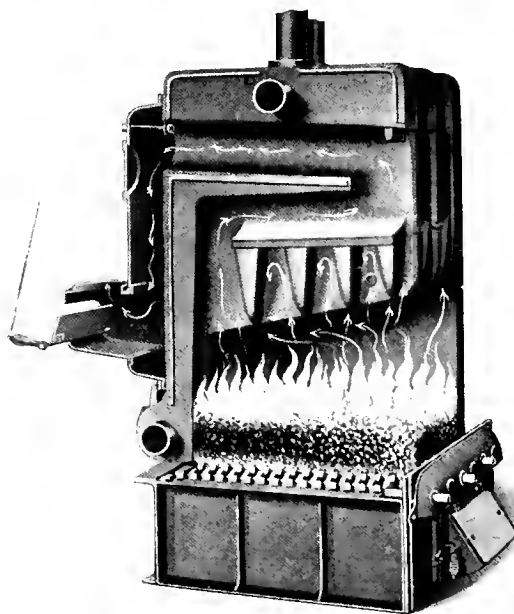

PHILADELPHIA, P A.

Since 1847 makers of all that is best in Stoves, Ranges, Furnaces and Boilers under the name "NOVELTY"

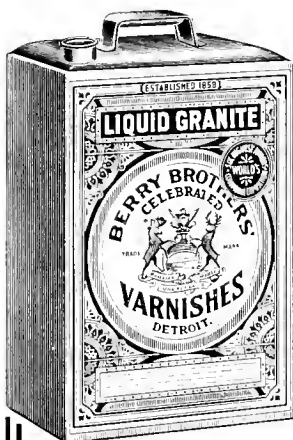

THE NOVELTY SQUARE BOILER

¶ Made in 25 sizes with ratings from 550 sq. ft. to 9,000 sq. ft. for Steam and 900 sq. ft. to 14,600 sq. ft. for Hot Water.

¶ This line, together with the line of Novelty Round Boilers and Novelty Warm-Air Furnaces include sizes and styles suitable for all types of houses.

Novelty Square Boiler—Interior View

VARNISH IN ARCHITECTURE

Uniformity

Next to Quality, uniformity is one of the leading essentials in varnish.

Varnishes or enamels put out under specific names by the same manufacturer should always be identical in every particular, no matter in what market they may be bought, nor how long between purchases.

Body, drying, working qualities, durability, and every other feature should be fixed facts and not uncertain quantities.

Such exactness needs not only accurate methods of manufacture, but an exceptionally large storage capacity to allow the varnish to remain in tank long enough to become ripe and mellow.

If you should ever come to Detroit and will take time to visit our factory we will show you tank rooms containing an aggregate of one and a half million gallons of varnish.

All our finishes are uniform and dependable.

LUXEBERRY WHITE ENAMEL—whitest white, stays white. Makes permanent snow-white finish in either gloss or dull effects.

LIQUID GRANITE—floor varnish. Makes smooth, satiny finish. Lasting, water-proof, mar-proof, also adapted for bath-rooms, window sills and casings, and all interior work where great durability is desired.

LUXEBERRY WOOD FINISH—for general interior work. Develops and preserves the grain of all woods, and makes a handsome and lasting finish. Rubs perfectly.

LUXEBERRY SPAR—for exterior work. Especially adapted for durability under extreme exposure—front doors, store fronts, marine work, etc. Makes handsome finish and will not turn white under the severest conditions of wear.

A New Greenhouse Catalog

TO fully encompass the many radical changes in greenhouse and conservatory adaptations, and consequent advances in construction, we have just completed a greenhouse catalog of unusual completeness.

Without seeming to be blowing our horn a bit too stridently; feel we might even

go so far as to say: it's quite the most complete and up-to-date catalog of greenhouses yet published.

As a reference book, it can be of such value to the architect, that it should be in his files.

For the client, it will bring a new conception of the pleasures and possibilities of glass-enclosed gardening.

You are welcome to a copy.
